C
DIRECTOR OF PUBLIC HEALTH IN MYSORE
BANGALORE

Memo No C20-201 dated the 20th March 1954
22

Retransmitted to the Secretary to Government, Revenue Department, Bangalore,-

21) It is unfortunate that the question of jurisdiction between the Corporation, the Trust Board and the District should be interfering with the progress of activities relating to Public Health and other matters

22) As a result of unavoidable circumstances, there has been a sudden and very large influx of population into Bangalore during and after the war and many slums have developed in its immediate neighbourhood Some of these are also still considered not to be in the Corporation area At the time when epidemic diseases are reported from these slums, the Corporation could have the District Health agency to take up control measures In the interest of the City's health, however both the City Health Organisation and the District staff have taken action on such occasions

23) The Trust Board are now laying out new extensions and in some of them a few houses have been built and occupied These have not been handed over to the Corporation for maintenance yet as the latter refuse to take these over since, the works in connection with water supply, sewage, roads etc, have not been completed in these areas by the Trust Board The new Receiving Station colony is one such

24) There is a rule (Public Health Act 194) in the Corporation that new houses can be occupied only after the occupiers obtain authorisation from the Corporation But there does not seem to be any such rule in the Trust Board This appears to be one of the

neet

New Receiving Station, P Hqrs

the reasons why the houses built on Trust Board land are being occupied before the amenities are provided

25) It is not known whether taxes are levied on these houses and if so which of the two authorities, Corporation or District Board If taxes have been levied it is necessary that the Public Health and other amenities are given to the occupiers by the authority that collects the taxes But the Trust Board have no Health agency and they cannot, therefore, afford these services to these people

26) These are some of the points which need clarification by Government However, while the settlement of technicalities in regard to the question of other amenities may brook some delay, that of the public health cannot Being part of the City, the care that needs to be exercised in safeguarding the health of the population residing in these new areas is as great as, and indeed in the case of the schemes/slums much greater than that is needed in the area comprising the Corporation This is necessary in the interest of the so called Corporation area itself, because epidemic diseases are governed by natural laws and are not limited by man made boundaries

27) The District Health services in Bangalore District have not yet been developed in the same intensive manner as in some others The staff is very small and it is hardly possible for them to render health services in the manner required in a Corporation

28) In the interest of health of the people of the city, it is very necessary that the jurisdictional question is waived, and that all such areas are taken up by the Corporation Health agency for affording the required protection, the staff being adequately increased for the purpos

ELECTRICAL BRANCH

The Secretary to Government,
Electrical Department,
Bangalore

Sir,

New Receiving Station, Bangalore

I write to report for the kind information of Government, that a case of small-pox was suspected by the Assistant Surgeon, Malleswaram during his weekly visit to the colony

The District Medical Officer, could not render any help as this colony is stated to be in the jurisdiction of the City Improvement Trust Board, and the District Health Officer, also could not help since this colony is in the jurisdiction of Corporation

The Director of Public Health was however kind enough to aid by isolating the patient in the E D Hospital and vaccinating 200 persons in the colony

I am of the opinion that in the interest of this colony, its jurisdiction within the District of Bangalore or with City limits, Bangalore, should be decided as soon as possible to get the colony residents the necessary aid in such cases

This is a general question will have to be further dealt with by the Municipal Branch may be referred to the Asst Secy Municipal Branch

Yours faithfully,

(G Chandy)

GOVERNMENT OF MYSORE

637/ett 93-53-4 Mysore Government Secretariat/
(Municipal Branch)
Dated Bangalore 15-4-54 195

FROM

The *Secretary to the Government of Mysore*
L S G & Planning Departments

To

The Commissioner,
Corporation of the City of Bangalore
(thro' the Mayor)

Sir,

Subject New Receiving Station - Bangalore

With reference to your letter No A4 P R 22/53-54 dated 27th January 1954 on the subject, I am directed to state that the Director of Public Health, who was consulted in the matter expresses concern over the fact that the question of jurisdiction between the Corporation, the Trust Board and the District should be interfering with the progress of activities relating to public health and other matters and states further as follows -

i) as a result of unavoidable circumstances, there has been a sudden and very large influx of population into Bangalore during and after the war and many slums have developed in the its immediate neighbourhood Some of these are also still considered not to be in the Corporation area At the time when epidemic diseases are reported from these slums, the Corporation could have the District Health agency to take up control measures In the interest of the City's health, however, both the City Health Organisation and the District staff have taken action on such occasions

ii) the Trust Board are now laying out new extensions and in some of them a few houses have been built and occupied Those have not been handed over to the Corporation for maintenance yet as the latter refuse to take these over since, the works in connection with water supply, sewage, roads etc , have not been completed in these areas by the Trust Board the new Receiving Station colony is one such

iii) There is a rule (Public Health Act 1944) in the Corporation that new houses cannot be occupied only after the occupiers obtain authorities authorisation from the Corporation But there does not seem to be any such rule in the Trust Board This appears to be one of the reasons why the houses built on Trust Board land are being occupied before the amenities are provided

iv) It is not known whether taxes are levied on these houses and if so by which of the two authorities Corporation or District Board If taxes have been levied it is necessary that the Public Health and other amenities are given to the occupiers by the authority that collects the taxes But the Trust Board have no Health agency and they cannot, therefore, afford these services to these people

v) These are some of the points which need clarification by Government However, while the settlement of technicalities in regard to the question of other amenities may brook some delay, that of the public health cannot Being part of the City, the care that needs to be

to be exercised in safeguarding the health of the population residing in these new areas is as great as, and indeed in the case of the slums much greater than what is needed in the area comprising the Corporation This is necessary in the interest of the so called Corporation area itself, because epidemic diseases are governed by natural laws and are not limited by man made boundaries

vi) The District health services in Bangalore District have not yet been developed in the same intensive manner as in some others . The staff is very small and it is hardly possible for them to render health services in the manner required in a Corporation

vii) In the interest of health of the people of the City, it is very necessary that the jurisdictional question is waived, and that all such areas are taken up by the Corporation health agency for affording the required protection, the staff being adequately increased for the purpose

In the light of the above, I am to request you to afford necessary protection to this area through the health agency of the Corporation

Yours faithfully,

(V Hanumanthappa)
